

Manufacturing Plant Equipment

Sr. No.	Equipments
01.	Multi-purpose reaction vessels of stainless steel capacity range 14 Kl - 6Kl having total capacity of about 125 m ³
02.	Glass lined reactors (mostly pfadler make) capacity range 0.5 Kl - 5 Kl having total capacity about 50 m ³
03.	Hostelloy Reactors - 4 Nos. of 1000 - 1200 Ltrs. under erection
04.	Hydrogenerator - capacity up to 20 a.t.m. distillation units with 30 theoretical plates, vacuum upto 20 m bar, temperatures 220°C
05.	High Vacuum Distillation Units - capacities 2000 - 4000 Ltrs
06.	15 Nos. Centrifuges (stainless steel as well as acid proof with facility of top & bottom discharge)
07.	Centralised distillation units for solvent recoveries
08.	Filtration system includes Leaf Filters, Agitated Neusche Filters & Sparkle Filters
09.	Drying System includes Fluid Bed Dryers, Rotary Vacuum Dryer & Tray Dryers
10.	Separated areas for Micronising, Blending, Sieving, Milling & Compacting all equipped with Air Filtration & Monitoring
